PROFESSIONAL SUMMARY

Results-driven Python Developer with hands-on experience in building scalable backend systems, RESTful APIs, and Full-Stack applications with Designed scalable backend architectures using Flask and Django. Proven ability to optimize performance, integrate real-time systems, and deliver production-ready solutions. Strong foundation in Data Structures, Object-Oriented Programming, and system design, with a focus on writing clean, maintainable code.

EDUCATION

Bachelor of Technology, Computer Science & Engineering
Raja Balwant Singh Engineering Technical Campus, Agra | 2022 - 2026 | Ist-DIV

TECHNICAL SKILLS

Languages C, Python, Java, HTML, CSS, JavaScript

Frameworks / Library Flask, FastAPI, Django, Pandas, NumPy, LLM/RAG(Basic)

Database / Tools SQL, Excel(Basic), Git/GitHub, Google Colab, Render, PythonAnywhere

Core Strengths Backend Development, RESTful APIs, Debugging, System Design, API Integration, Optimization, OOP, ML

PROFESSIONAL EXPERIENCE

Python Developer (Intern / Project Role) - ADRDE (DRDO), Ministry of Defence, Govt. of India | Jun 2025 - Jul 2025

• Developed **5+ REST APIs** using Flask, improving data response efficiency.
• Integrated Python scripts with web frontends to support real-time data updates and dashboard-style workflows.
• Troubleshot Flask static file serving issues and improved application reliability during development.
• Deployed production-ready applications on Render and PythonAnywhere, focusing on smooth release and access
flow.

Software Developer (Project Role)
• Built a full-stack application using Flask and Python with REST API integration.
• Created responsive frontend components and worked on improving user experience across devices.
• Supported end-to-end feature development, from data handling to UI presentation.
• Applied debugging and optimization practices to improve maintainability and performance.

ACHIEVEMENTS / STRENGTHS

• Strong practical exposure to web app development using Python-based frameworks.
• Experience with portfolio-style deployment and project presentation.
• Good problem-solving mindset with interest in backend logic, frontend presentation, and deployment.
• Consistent self-learning approach across web development and core programming concepts.

LANGUAGES

Hindi - Native | English - Spoken

PROJECTS

Flask-Based Portfolio Website

• Designed and deployed a personal portfolio website to showcase projects, skills, and contact details.
• Focused on clean navigation, responsive layout, and professional presentation for recruiters.
• Used Flask for backend structure and integrated deployment-ready workflow.

Web Application for Data Analysis / Visualization

• Developed a Flask-based web application for data handling and visualization.
• Connected Python scripts with web pages to present outputs in a user-friendly format.
• Strengthened skills in API-style data flow, dynamic rendering, and debugging.

Service / Utility Web Pages

• Created multiple responsive web pages as part of practice projects and development exercises.
• Improved page structure, styling consistency, and usability across screen sizes.
• Applied HTML, CSS, and JavaScript basics to enhance interactivity.

Object Detection System in Space (Final Year Project)

Tech Stack: Python, OpenCV, Machine Learning, Deep Learning, YOLO/CNN

- Developed an intelligent object detection system for identifying and tracking space objects such as satellites, debris, and celestial bodies using computer vision and deep learning techniques.
- Implemented image processing and object recognition algorithms to improve detection accuracy in complex space environments.
- Used Python-based machine learning models for real-time analysis and classification of objects.
- Enhanced system performance through data pre-processing, model optimization, and accuracy evaluation.
- Designed the project to support space surveillance, collision avoidance, and automated monitoring applications.

SEWA-SETU / Service Booking Web Platform

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL,

• Developed a full-stack service booking platform connecting users with local service providers.
• Designed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript.
• Built backend functionalities using PHP and MySQL for service management, user handling, and data storage.
• Implemented a dynamic review and rating system for individual service providers.
• Integrated Razorpay payment gateway for secure online transactions.
• Developed database-driven features including authentication, service listings, and customer interactions.
• Improved usability with structured navigation, responsive layouts, and optimized workflows.
• Worked on frontend-backend integration, debugging, and deployment processes for smooth application performance.

CERTIFICATIONS

• DBMS – NPTEL
• C Programming and Assembly Language – NPTEL
• Operating System – Coursera
• C Programming Everywhere – Coursera
